

MAZEN SABRY AHMED HASSAN

Junior Data Engineer

Alexandria, Egypt | 01090493095 | mazensabry676@gmail.com | [LinkedIn](#)

PROFILE

Junior Data Engineer with a Computer Science background (Faculty of Science, Damanhour University) specializing in Data Engineering through the Digital Egypt Pioneers Initiative (DEPI). Solid foundation in Object-Oriented Programming, Data Structures, Algorithms, Database Systems, and ETL concepts, with hands-on backend and data-layer development experience from a graduation project. Practical IT support background with strong troubleshooting and problem-solving skills. Seeking a Junior Data Engineer role to design and build scalable data pipelines.

TECHNICAL SKILLS

Programming: Python, OOP (Object-Oriented Programming)

Data Engineering: ETL Concepts, Data Pipelines, Apache Spark, Hadoop, Apache Kafka

Cloud: Microsoft Azure

Databases: SQL Server, Relational Database Design

Backend Development: Flask, REST APIs, Selenium (Web Scraping/Automation)

Core Computer Science: Data Structures, Algorithms

IT Support: Hardware/Software Troubleshooting, Networking Basics

TRAINING & CERTIFICATIONS

Digital Egypt Pioneers Initiative (DEPI) – Data Engineering Track

Expected Dec 2026

Ministry of Communications and Information Technology (MCIT) – Trainee (In Progress)

- Enrolled in an intensive professional track covering Data Engineering fundamentals, ETL concepts, SQL, and big data processing.
- Gaining practical skills in designing and building scalable data pipelines, data architecture, and cloud technology principles.

SQL – DataCamp

Python – DataCamp

EXPERIENCE

IT Support Specialist – Fathallah

Jun 2025 – Oct 2025

- Provided technical support and troubleshooting for hardware, software, and network issues.
- Assisted staff with day-to-day IT problems, ensuring minimal downtime and smooth operations.
- Maintained and monitored systems to ensure reliability and performance.

GRADUATION PROJECT

Waffarly – Price Tracker (Backend Developer)

2026

- Designed and developed a price-tracking web application using Object-Oriented Programming principles.
- Built backend services and RESTful APIs using Python and Flask to handle product data and price requests.
- Implemented automated web scraping with Selenium to collect and update product price data from external sources.
- Built the data layer with SQL Server, applying relational database design and data structures for efficient storage and retrieval.
- Implemented core algorithms for tracking and comparing product prices over time.
- Applied Python throughout the development lifecycle, from logic design to data handling.

EDUCATION

B.Sc. in Computer Science & Mathematics

Graduated 2026

Faculty of Science, Damanhour University

LANGUAGES

Arabic: Native

English: B1 (Intermediate)
